

*The Swedish Energy Agency and the Swedish Smart Grid Forum would like to announce the following public workshop of the International Smart Grid Action Network (ISGAN):*

## The future of electricity markets in a low carbon economy

**Date and time:** 2 April 2019, 9:00–16:30

**Place:** Clarion Sign Hotel, Östra Järnvägsplan 35, Stockholm, Sweden

The event will focus on international experiences and lessons learned, with emphasis on the importance of market design in relation to the following key aspects of power systems transformation and smart grid development;

- New market opportunities enabled by digitalization of the power sector
- Flexibility and power system interaction and optimization leveraged by smart grid solutions
- Innovative regulatory approaches to advance smart grids deployment with focus on experimental sandboxes

A detailed agenda and information on how to register will follow soon.

Welcome!
