LONG-TERM PLANNING & IMPLEMENTATION OF SMART DISTRIBUTION GRIDS

WORKSHOP
Highlighting developments in South & Central America

16 May 2024
16:00-18:00 CEST
Online (Link)

WORKSHOP OBJECTIVES
During the workshop we will explore the preconditions, challenges, and opportunities based on the perspectives from key actors, who will provide examples from different countries in South and Central America.

- Engage in discussion and collaboration to address the topics related to strategic planning and distribution grids
- What are the fundamental prerequisites for grid development across diverse geographies?
- How do uncertainties impact the capacity of grid actors to effectively plan and implement distribution grids?
- How can actors with complementary roles and responsibilities work together to accelerate distribution grid transformation?
